

Swachh Bharat Mission – TCE plays a role

Towards realising Mahatma Gandhi's vision of a clean India, the Mahatma Gandhi Swachhta Mission is being integrated with Swachh Bharat Abhiyaan. TCEs worked with GNFC with a target of constructing 3000 toilets in the rural areas of Gujarat state. TCE is providing Engineering & PMC services to the project and five engineers are working with the client towards this cause to meet tough deadlines. About 2300 toilets have been completed, of which about 1764 have been handed over to the authorities.

TCE Engineers who worked on this project were – Dhiman Boral, Vivel Dutta, Ravi Singh, Anjani Singh, Sushil Sarangi and Soumen Debnath – under the undeterred support of Mr Jayesh Patel from TCE's Gandhinagar office. The team was extremely excited for this project, one of the members, Mr Anjani Ravi said, "Giving something back to the society has always been on my mind and being able to work on such a noble project was indeed a privilege. I am grateful to be part of TCE – an organisation which is taking an effort to contribute to the health and hygiene of society."
