Chitranjan Kaushik is the Chief Executive Officer of Ecofirst Services Limited, a Tata Enterprise and wholly owned subsidiary of Tata Consulting Engineers. With over 30 years of experience across sustainability, water resources, infrastructure planning, and environmental engineering, he is recognised as a leading voice in sustainable development and climate responsive design for the built environment.

Under his leadership, Ecofirst has emerged as one of India's leading sustainability consulting organisations, delivering transformative solutions across green buildings, urban infrastructure, industrial developments, and climate-resilient planning. He has played a pivotal role in driving the organisation's strategic growth, operational excellence, and innovation agenda, contributing to a nearly 20-fold expansion of the business over the past decade.

Chitranjan combines deep technical expertise with strategic leadership and a strong commitment to environmental stewardship. His work spans sustainable architecture, integrated water resource management, urban flood modelling, environmental planning, and regenerative development. He has led multidisciplinary programmes across large area developments, townships, industrial parks, institutional campuses, and infrastructure projects, with a strong focus on energy efficiency, low-impact development, and long-term environmental resilience.

Prior to his leadership role at Ecofirst, Chitranjan served in the Water Resources Department of the Government of Rajasthan, where he worked on major irrigation, flood management, dam safety, and water sector modernisation initiatives. He has also contributed to environmental and infrastructure assignments through consulting and project management roles across the public and private sectors.

His expertise in hydro informatics, watershed management, urban drainage systems, and water resource planning has enabled him to advise clients on complex sustainability and environmental challenges. He is also known for promoting innovation-led and data-driven approaches for resilient urban and infrastructure development.

A strong advocate for sustainable living and climate-positive growth, Chitranjan actively contributes to industry and professional forums related to sustainability, water management, and the built environment. His leadership continues to shape Ecofirst's vision of integrating environmental responsibility, technology, and design excellence to create future-ready and sustainable communities.
