Strategic tie-up to boost semiconductor skills, aligning with India's push for global leadership in critical technologies

freesource

Tata Consulting Engineers (TCE), part of the Tata Group, has signed a Memorandum of Understanding (MoU) with Arizona State University (ASU), USA, to strengthen collaboration in critical and emerging technologies, beginning with semiconductor workforce development, as per media reports.

The partnership aims to advance India's semiconductor ecosystem by building skilled talent in fabrication, cleanroom systems, contamination control and sub-fab infrastructure. The initiative will combine expert-led sessions with applied, industry-aligned projects to prepare professionals for the semiconductor sector.

The first joint initiative will offer comprehensive train and technical professiona
