I'm PortAI, I can summarize articles.

India is investing \$134 billion in manufacturing, leveraging AI to modernize factories. Major manufacturers like Reliance New Energy, Hero MotoCorp, and Addverb Technologies are collaborating with NVIDIA and Siemens to implement software-defined factories using NVIDIA's CUDA-X and Omniverse libraries. Companies like Havells and Larsen and Toubro are utilizing advanced design tools from Synopsys and Cadence to enhance product development. Additionally, Tata Consultancy Services and Wipro PARI are integrating AI infrastructure for automation and quality checks, while Tata Consulting Engineers is launching a Cognitive Twin platform for real-time industrial simulations.
