Asaman Prasad Patnaik is a senior Business Excellence leader with over three decades of professional experience spanning engineering, academia, plant operations, and strategic transformation. He currently serves as Head of Business Excellence at Tata Consulting Engineers, where he leads enterprise-wide initiatives to strengthen performance, governance, and sustainable excellence across diverse business units and geographies.

With more than 16 years at Tata Consulting Engineers, Asaman brings deep institutional knowledge and a strong track record in deploying structured excellence frameworks. His work has been instrumental in driving operational improvements, enhancing organisational efficiency, and enabling risk-informed decision-making aligned with the Tata ethos. He has played a key role in embedding a culture of continuous improvement and accountability, ensuring that excellence is not only a framework but a way of working across the organisation.

Prior to joining Tata Consulting Engineers, Asaman built a strong foundation across industry and academia. He served as Assistant Professor and Head of Chemical Engineering at the Gandhi Institute of Engineering Technology, where he contributed to academic leadership and capability building. He later transitioned to industry roles, working in project engineering and plant operations in the sponge iron and steel sector. His experience includes coal-based DRI process design, basic and detailed engineering, commissioning, and plant operations, along with business development responsibilities. These roles provided him with deep technical expertise in metallurgy, process engineering, and industrial operations.

His leadership experience spans Business Excellence, Asset Integrity Management, Project Management, and Enterprise Risk Management. Through this integrated approach, he enables a holistic and systems-driven view of organisational performance. He has successfully guided teams in adopting best practices, improving process maturity, and aligning business objectives with long-term strategic goals.

Asaman is known for his values-driven leadership and his ability to translate complex organisational challenges into structured and actionable solutions. His approach combines technical depth with a strong focus on people, fostering collaboration and capability building across teams.
