Biswajit Bhattacharyya is Vice President and Global Business Head for the Mining and Metals Business Unit at Tata Consulting Engineers. He is a seasoned industry leader with over three decades of experience in extractive metallurgy, engineering consulting, and business leadership across global markets.

In his current role, he is responsible for shaping the strategic direction of the Mining and Metals Business Unit, driving business growth, strengthening capabilities, and leading key client engagements across India, Europe, Africa, Asia Pacific, and the Middle East. He plays a critical role in expanding the organisation's presence in the global metals and mining sector while reinforcing its position as a trusted engineering and consulting partner.

Biswajit has extensive expertise in extractive metallurgy, process engineering, and sustainability in metallurgical industries. He is recognised for leading large scale transformation initiatives, particularly in decarbonisation, where he has worked closely with leading steel and aluminium producers to support their transition towards low carbon and future ready operations. His approach integrates technical excellence with strategic insight, enabling clients to navigate complex industry challenges and achieve long term value.

At Tata Consulting Engineers, he has been instrumental in driving technical excellence, business development, and customer engagement across geographies. His leadership has contributed to strengthening the organisation's capabilities in delivering multidisciplinary engineering and project management solutions for complex mining and metals projects.

Prior to and alongside his leadership responsibilities, Biswajit has built a strong technical foundation as a chemical engineer, with advanced training in extractive metallurgical operations. He is a Fellow of the Southern African Institute of Mining and Metallurgy and has contributed to industry knowledge through technical publications.

With a deep understanding of global markets and industry dynamics, he brings a balanced perspective of technical depth and business leadership. His experience across diverse geographies and sectors enables him to guide strategic initiatives, foster innovation, and enhance global competitiveness.

Biswajit continues to play a key role in advancing Tata Consulting Engineers' Mining and Metals business, with a strong focus on sustainability, innovation, and delivering impactful solutions for clients worldwide.
