Puesh Ajmani is the Chief Digital Officer at Tata Consulting Engineers, where he leads the company's digital and AI transformation agenda. With over two decades of experience, he is a recognised leader in digital strategy, advanced analytics, and enterprise technology transformation across global organisations.

In his current role, Puesh is responsible for embedding AI driven capabilities across engineering design, project delivery, and client solutions. He focuses on building data driven platforms and intelligent systems that enhance operational efficiency and engineering excellence. His work is centred on enabling the organisation to leverage emerging technologies to deliver measurable business impact and future ready solutions.

Puesh is known for driving large scale digital transformation programmes, integrating artificial intelligence, advanced analytics, and enterprise platforms into core business processes. His expertise spans digital transformation strategy, data platforms, industrial AI, and intelligent engineering, enabling organisations to move towards more agile, data led decision making.

At Tata Consulting Engineers, he plays a key role in shaping digital strategy and strengthening the organisation's capabilities in AI led engineering and digital delivery. His approach combines strong business understanding with technology depth, ensuring that digital initiatives are aligned with strategic objectives and deliver tangible outcomes.

Prior to joining Tata Consulting Engineers, Puesh served as the Global Chief Digital and Information Officer at Welspun Living, where he led enterprise wide digital transformation initiatives. His work included building AI enabled supply chains, blockchain based traceability platforms, and digital commerce capabilities. Earlier, he held leadership roles at Mahindra and Mahindra and Tata Motors, where he established advanced analytics capabilities and enterprise data platforms to support strategic decision making and operational optimisation.

With experience across manufacturing, infrastructure, and global enterprise environments, Puesh has consistently built and scaled digital capabilities that drive business value. He is recognised among India's leading digital and analytics leaders and has been associated with global technology communities, including the MIT Technology Review Panel and the World Economic Forum's AI leadership initiatives.
