Sridhar Radhakrishnan is the Chief Financial Officer at Tata Consulting Engineers, bringing over 20 years of experience across corporate finance, strategy, and investment management within the Tata Group and global organisations. As a member of the senior leadership team, he plays a key role in shaping the company's financial strategy, governance framework, and long-term value creation agenda.

At Tata Consulting Engineers, Sridhar leads the organisation's finance function, overseeing financial planning and analysis, treasury, business finance, and capital allocation. He works closely with the Board and executive leadership to align financial strategy with business priorities, ensuring disciplined growth, profitability, and strong governance. His role also includes driving performance management frameworks, strengthening financial controls, and enabling data-led decision-making across the enterprise.

Sridhar brings extensive experience in corporate finance and strategic initiatives. Prior to joining Tata Consulting Engineers, he was with Tata Chemicals, where he led Strategic Finance and Investor Relations and served as India Business Controller. Earlier, he worked with Tata Sons in the Chairman's office, where he was actively involved in mergers and acquisitions, business evaluations, and strategic initiatives across multiple sectors, supporting key investment decisions at the Group level.

He has also held leadership roles at Tata Teleservices, where he was involved in large-scale fundraising across debt and equity markets, financial planning and analysis, and business partnering. His early career includes experience with Whirlpool and Deloitte, where he built a strong foundation in financial reporting, audit, and cost management.

Having qualified his Chartered Accountancy exams, Sridhar is known for his analytical rigour, strategic thinking, and ability to drive financial discipline while enabling business growth. His leadership approach combines strong governance with agility, enabling organisations to navigate complex business environments and deliver sustainable performance.
